SUMMARY

AI & Data Science student with hands-on experience in machine learning, cloud computing (AWS), and full-stack development using Python and Flask. Built multiple real-world projects including ML models, analytics dashboards, and full-stack applications. Strong foundation in data-driven problem solving, with leadership experience in tech communities and hackathons.

EXPERIENCE

Programmer Analyst Intern

Cognizant

March 2026 - Present, Kochi, India

- Gained experience on SQL, data processing, ETL, Data Warehousing and AI/ML fundamentals through structured project-based tasks and hands-on learning.

Cloud Technical Intern

(IAM)OPS

January 2026 - March 2026, Surat, India

- Performed hands-on cloud labs using AWS services (EC2, S3, IAM, VPC, etc).
- Performed Linux-based system operations and command-line tasks.
- Configured and managed virtual machines, storage, and access control in cloud environments.
- Implemented user roles and permissions using IAM policies.
- Practiced networking concepts including security groups and instance connectivity.
- Built foundational understanding of cloud computing and DevOps workflows.

PROJECT

FinPlan.ai

github.com/stupefyingcoder/FinPlanAI

- Developed a full-stack financial planning system using FastAPI and React, serving multiple modules via 10+ REST APIs.
- Designed event-driven workflows handling 1000+ data points for financial profiling and recommendations.
- Containerized services using Docker, improving deployment consistency and reducing setup time by ~30%.
- Integrated RAG-based AI agents (LangChain, FAISS) to generate contextual financial insights from dynamic data.
- Followed clean code, Git version control, and testing practices, improving maintainability and collaboration.

SeatAlgo

github.com/stupefyingcoder/KCET-Seat-Prediction

- Implemented ML-driven prediction engine with historical CET data and ensured system scalability for large datasets.
- Achieved 90% accuracy on mock seat predictions; optimized model performance with data preprocessing pipelines.
- Designed backend architecture for the college recommendation platform using Flask and REST APIs.
- Built a user-friendly platform integrating predictive insights and an intuitive interface for seamless access.

StockSense

github.com/stupefyingcoder/Stocksense

- Developed a machine learning model to predict stock prices based on historical data and financial indicators.
- Incorporated sentiment analysis of news articles and social media to enhance prediction accuracy.
- Used models like Random Forest and LSTM to predict price trends and evaluate performance with metrics like MAE and MSE.
- Gathered data using APIs (Yahoo Finance) and visualized insights with Python libraries.

Eye from above: Oil Spill Detection

Smart India Hackathon

- Built backend logic for real-time vessel tracking using Marine Traffic API; handled hourly data ingestion and storage.
- Detected oil spills with 95% accuracy using a CNN-based DeepLabV3 segmentation model (ResNet50).
- Captured real-time satellite imagery with Sentinel Hub API for anomaly analysis.
- Reduced system response time by 50% through efficient backend optimization.

EDUCATION

BE in Artificial Intelligence and Data Science

Dr. D. Y. Patil Institute of Technology • Pimpri, Pune • 2026 • 8.21

Class 12 CBSE

Matrix Academy School • Virar, Palghar, IN • 2021 • 94.8%

Class 10 CBSE

Matrix Academy School • Virar, Palghar, IN • 2019 • 97.8%

INVOLVEMENT

President

Data Science & Artificial Intelligence Inquisitive Club

- Led 50+ members across AI and Data Science workshops, coding contests, and GenAI bootcamps, boosting club engagement through tech and non-tech events.
- Mentored juniors on backend and ML projects, fostering a collaborative and project-driven culture.

Public Relations Officer

DevKraft

- Led outreach efforts for one of Pune’s largest hackathons, onboarding 200+ participants and 5+ partners.
- Collaborated with technical teams to streamline backend judging infrastructure and participant data handling.

Community Networking Associate

TEDx

- Orchestrated outreach and engagement strategies to attract 1000+ attendees for TEDxDYPIT, working directly with the esteemed speakers.

SKILLS

Languages: Python, C++, SQL

Backend & Frameworks: Flask, FastAPI, REST APIs, MySQL, Git

Machine Learning: Scikit-learn, Pandas, Numpy, TensorFlow, Keras

Data Science: Data Analytics & Visualization, Machine Learning, Exploratory Data Analysis, Power BI

Tools & Tech: Docker, Postman, VSCode, GitHub

Other Skills: Teamwork, Leadership, Critical Thinking, Effective Communication, Coordination

Cloud & DevOps: AWS (EC2, S3, IAM), Docker
